

Global Solutions 4, LLC. introduces a patent pending solution for your cell phone, iPod/MP3 players and all your electronic charging needs.

(Corporate Wire) Coconut Creek, Florida, Global Solutions 4, a leader of innovative products has announced the introduction of the new "Secure It" solution for your electronic charging needs that keeps all of your charging cords up off the floor and easily accessible. The new "Secure It" eliminates the need to be reaching down or crawling behind a desk/night stand to reach your cell phone cords on the floor.

"Secure It" is a small device (2.5"x1.5"x.5") that securely holds two of your electronic charging cords in place on most any surface. The "Secure It" can be placed wherever it is that you charge your cell phones, iPods/MP3 players, blue tooth ear pieces, digital cameras, etc. The great advantage is that this small device stays secure holding the cords up and off the floor where you want easy access to them. No longer do you have to reach behind your night stand or crawl under your desk to get the cord that has fallen behind or under it. It also eliminates the need to be bending down to just above floor level to connect your power cord. You can now keep the cord plugged into the outlet and simply use "Secure It" to keep it securely in the location that is easily accessible to you. Whether you are traveling, at home or at work, "Secure It" is the solution that eliminates the searching, bending and reaching for your charging cords behind or under furniture or counters.

With so many small electronic devices in households today that all require daily charging, it became apparent that we needed to come up with an item that would eliminate the problem of bending, crawling and reaching for these cords on a daily basis. "Secure It" was developed as a solution to the problem that almost everyone faces on a daily basis. "Secure It" has a non skid bottom that allows it to stay in place, while being able to hold two cords securely in place simultaneously.

The problem with other items in the market that hold your cords is that they have a huge footprint taking up too much space on a nightstand, desk or countertop, and are designed as an additional piece of furniture. The advantage to "Secure It" is that it is small, so it can be placed anywhere and not be obtrusive in any way. In addition, it will be inexpensive with an MSRP of under \$9.99.

The product will begin shipping in August 2009.
