

HoldUp Suspender Company Announces “No Buzz™” – A Line of Airport-Friendly Suspenders

SOUTHFIELD, MI., Nov. 1/PRNewswire/ -- HoldUp Suspender Company, the company that invented the No-Slip® Suspender Clip, announces No Buzz™, a new line of airport-friendly HoldUp Suspenders. No Buzz™ suspenders are specifically designed for frequent flying suspender-wearers and promise not to set off any airport security alarms.

These first-ever suspenders are built with plastic clasps and adjusters to hold onto any type of material. They have a patented plastic, flush-mounted Gripper Clasp® that ensures the suspenders will never slide or pop off. The Gripper Clasp® grips tighter the more the fabric is pulled, but will not snag or tear apparel. In addition, the clasp comes with a lifetime warranty and a 30-day money-back 100% satisfaction guarantee.

Now travelers have a metal-free suspender option and can breeze through security without worrying about setting off alarms. These American-made, top-quality suspenders give travelers the first-ever, airport-friendly suspender option.

About HoldUp Suspender Company

HoldUp Suspender company is the leader and innovator in the suspender industry, making over 200 colors and styles of suspenders for men and women. HoldUp suspenders are the only brand of suspenders sold with the patented No-Slip® Clip invented specifically to hold on to the pant, and not slip or pop off. All HoldUp products are assembled in the USA and sold with a 30-day money-back guarantee if a consumer is not satisfied. More information can be found at www.suspenders.com.
